

Alignment Process

- 1 PinMate displays two opposing target cavities for alignment. Operator drags and drops the targets into place.

Click the down arrow to move to the next page

Spare Pins & Seal Plugs

2 Add the spare pins and sealing plugs (if applicable).

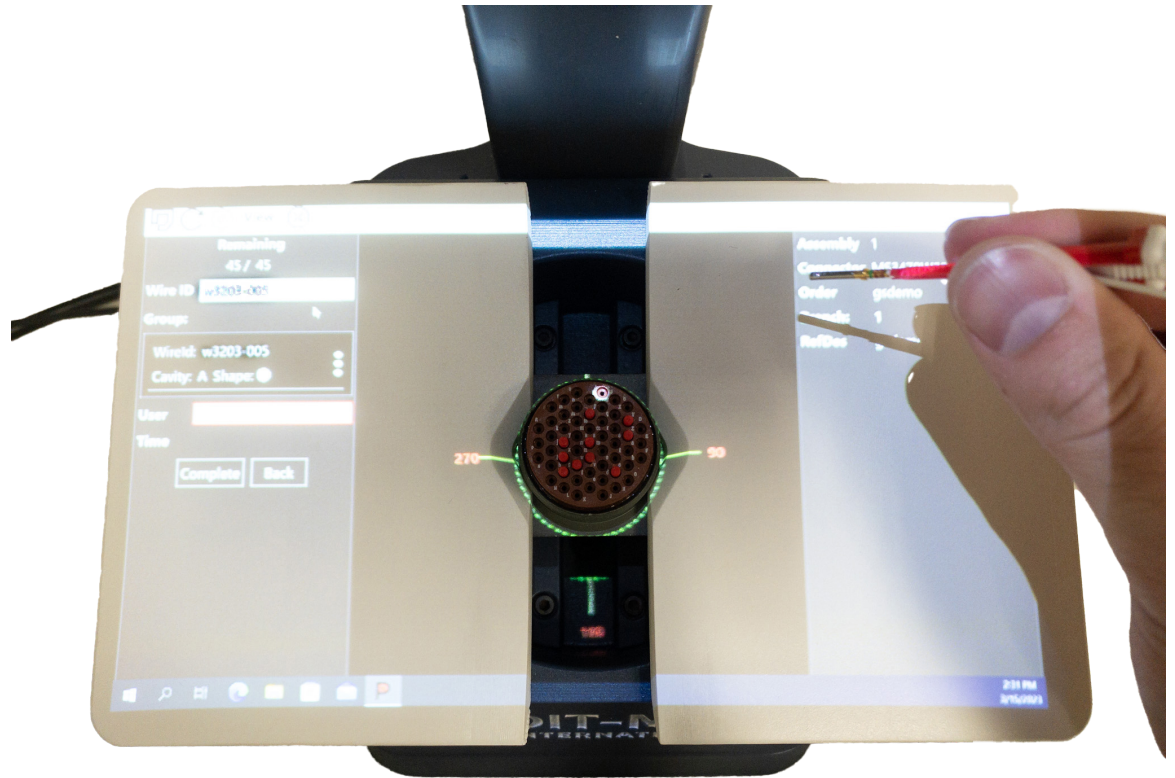

Click the down arrow to move to the next page

Inserting Wires

3 Operator enters a wire ID and inserts a wire.

Click the down arrow to move to the next page

Process Completed

4 Process continues until the connector is fully pinned.
